

\$ETHmaxxing · ERC-20 · ETHEREUM MAINNET

# *We Are The Mainnet.*

Official Whitepaper — May 2026

Built on Ethereum Mainnet · Uniswap V4

...

*"The culture lives on since 2015 — ETHmaxxing is here to amplify it."*

## MANIFESTO

# Abstract

ETHmaxxing (\$ETHmaxxing) is a community-first ERC-20 token built natively on Ethereum Mainnet, born from the conviction that Ethereum is not just a blockchain — it is a culture, a movement, and the undisputed home of decentralized finance. With a total supply of 1,000,000,000 tokens, ETHmaxxing aims to unite the Ethereum community under a single banner, rewarding holders, fueling grassroots marketing, and establishing a presence on major exchanges. The culture lives on since 2015 — and ETHmaxxing is here to amplify it.

## 1 Introduction

The Ethereum ecosystem has grown from a bold experiment into the world's most powerful programmable blockchain. With the successful transition to Proof-of-Stake, the rise of Layer 2 solutions, spot ETH ETFs, and growing institutional adoption, Ethereum stands at the threshold of its most significant era yet.

ETHmaxxing is a meme and community token that captures the raw energy of Ethereum culture. It does not promise complex DeFi mechanics or revolutionary technology — it promises something equally powerful: community, identity, and the shared belief that ETH is the apex asset of the on-chain world. **We are the Mainnet.**

## 2 Vision & Mission

**Vision:** To become the defining community token of the Ethereum ecosystem — the symbol of ETH maximalism worn proudly by believers, builders, and degens alike.

**Mission:**

- Unite the Ethereum community under a shared cultural identity
- Drive organic growth through grassroots marketing and viral content
- Establish \$ETHmaxxing on major centralized and decentralized exchanges
- Reward long-term holders and active community contributors
- Keep the culture of Ethereum alive and loud

### 3 *Tokenomics*

ETHmaxxing is designed with a fair, community-oriented token distribution. Total supply is fixed at **1,000,000,000 \$ETHmaxxing** with no minting capability after launch. The overwhelming majority of tokens go directly to public trading, ensuring maximum decentralization from day one.

Allocation	Percentage	Tokens	Purpose
Public Trading	83%	830,000,000	Open market — fully decentralized
Marketing	7%	70,000,000	Campaigns, influencers, viral content
Exchange Listings	10%	100,000,000	CEX listings & market making

#### Key Tokenomics Principles

- Liquidity locked immediately at launch for community safety
- Contract renounced after launch — fully decentralized
- 83% public supply ensures true community ownership from day one
- No team allocation, no insider unlocks, no early dumps

### 4 *Technology*

ETHmaxxing is deployed as a standard ERC-20 token on Ethereum Mainnet and launched on **Uniswap V4** — the most advanced decentralized exchange protocol to date. Uniswap V4 introduces native hooks, singleton contracts, and flash accounting, enabling more efficient and flexible liquidity management. By building on Ethereum, \$ETHmaxxing benefits from:

- Proof-of-Stake consensus — energy efficient and secure
- Full EVM compatibility — works with all major wallets (MetaMask, Ledger, Coinbase Wallet)
- Uniswap V4 — cutting-edge AMM with hooks and singleton architecture
- Etherscan-verified contract — fully transparent and auditable
- Layer 2 bridging ready — future compatibility with Arbitrum, Base, Optimism

The smart contract is a clean, minimal ERC-20 implementation with no hidden fees, no blacklist functions, and no owner privileges after renouncement. A third-party audit will be completed prior to launch.

## 5 The Sacred Roadmap

*This is not a roadmap. This is a prophecy. ETHmaxxing does not follow the market — the market follows ETHmaxxing. Three phases. Three awakenings. One destiny: the Mainnet ascends.*

### PHASE I — THE AWAKENING

\$1M Market Cap

- **The token is born** — contract deployed, liquidity locked, contract renounced
- **The congregation assembles** — community channels open, the first disciples arrive
- **First alliances forged** — founding partnerships sealed in the name of the Mainnet

### PHASE II — THE EXPANSION

\$1M – \$10M Market Cap

- **The ledgers recognize us** — CoinMarketCap & CoinGecko listings secured
- **New alliances, new power** — additional strategic partnerships announced
- **Wear the faith** — ETHmaxxing merchandise drops for the true believers
- **Centralized gates open** — first CEX listings achieved
- **One thousand souls** — 1,000 holders milestone reached and celebrated
- **The cult rewards its own** — community giveaways for the loyal

### PHASE III — THE DOMINATION

\$10M+ Market Cap

- **Elite alliances only** — major strategic partnerships with industry titans
- **The top exchanges bow** — Tier 1 CEX listings secured
- **The collection is revealed** — ETHmaxxing NFT collection launches for the devoted
- **The world watches** — sponsorship of major sporting events, the ETH flag flies globally

## 6 Community & Culture

ETHmaxxing is nothing without its community. The token was conceived as a rallying point for everyone who believes Ethereum is the endgame — traders, developers, NFT collectors, DeFi users, and longtime HODLers. The ETHmaxxing community is built on three pillars:

<i>Conviction</i>	We believe ETH is the apex on-chain asset. No debates, no doubts.
<i>Inclusion</i>	Everyone who believes in Ethereum is welcome — no gatekeeping.
<i>Amplification</i>	We create content, memes, and narratives that spread the ETH gospel.

## 7 Risk Factors

As with all cryptocurrency projects, \$ETHmaxxing carries inherent risks. Potential investors and community members should be aware of the following:

- Cryptocurrency markets are highly volatile — token value may fluctuate significantly
- The regulatory landscape for crypto assets is evolving and may impact the project
- Meme tokens carry higher risk than utility tokens — invest only what you can afford to lose
- Smart-contract risk exists despite auditing — no system is 100% guaranteed
- Market liquidity may be limited in early stages of the project

### Legal Disclaimer

This whitepaper is for informational purposes only and does not constitute financial, investment, or legal advice. \$ETHmaxxing is a community meme token with no guaranteed value or returns. Participation in any cryptocurrency project involves significant risk. Nothing in this document should be construed as a promise or guarantee of profit.
